## Floorline

## Lightweight, slip-resistant matting designed for

 areas where water is present and spills are frequent.

One of our most popular products, Floorline is perfect for any environment where liquid is present and storage compartment protection is needed.

The mat's open grid and embossed surface provides the highest slip resistance and drainage, making it an ideal walkway for slippery environments. The anti-fungal properties protects bare feet in changing areas and swimming pool surrounds. Made from a single tier of flexible PVC, Floorline is incredibly lightweight, making it easy to carry, move and lift for cleaning. Floorline is also a great choice to use as a compartment liner to keep tools and fragile equipment free from damage

Features:

## 

Etched surface

Open-grid construction

Anti-microbial and anti-fungal additives
$\qquad$

Made from non-
porous, flexible PVC

Comes in $33^{\prime}$ ( 10 m ) rolls

Benefits:
Certified slip resistant
Excellent drainage
(DIN 5II30: RII,
(DIN 5II $30: \mathrm{VIO})$
DIN 5I097:C,
ASTM I677:I.0/0.8)

## Floorline

Data sheet

Standard sizes:

| Product | Floorline |
| :--- | :--- |
| Height | $1 / 4^{\prime \prime}(6 \mathrm{~mm})$ |
| Standard roll options | $33^{\prime} \times 2^{\prime}(10 \times 0.6 \mathrm{~m})$ |
|  | $33^{\prime} \times 3^{\prime}(10 \times 0.91 \mathrm{~m})$ |
| Weight | $0.76 \mathrm{lb} / \mathrm{sq} . \mathrm{ft}(3.70 \mathrm{~kg} / \mathrm{m} 2)$ |

## Tolerances:

|  | Height $\left(+/-0.05^{\prime \prime}\right)$ | Length $\left(0+I .0^{\prime}\right)$ | Width $\left(+/-I / 2^{\prime \prime}\right)$ |
| :--- | :--- | :--- | :--- |
| Floorline | $1 / 4^{\prime \prime}$ | $33^{\prime}$ | $2^{\prime} 3^{\prime}$ |

All dimensions are nominal

## Technical information:

| Acoustic | Excellent sound absorption |
| :---: | :---: |
| Chemical | Resistant to most acids, alkalines and oils. You can read more about specific chemical resistances by downloading our chemical resistance statement. |
| Composition | Flexible Polyvinyl Chloride (PVC) |
| Environment | Floorline is $100 \%$ recyclable. We don't use any substances included in the SVHC list under REACH in any of our matting products.. |
| Fire | ENI 3501-I : 2007 and classified - Cfl - SI |
| Hygiene | Made from non-porous PVC that's naturally resistant to bacteria growth. Incorporates anti-microbial and anti-fungal additives for continuous hygiene. |
| Reversion | Thermoplastic shrinkage can result in size reductions up to $2 \%$. This may be accelerated in hot environments. You can read more about the causes of shrinkage by downloading our reversion statement. |
| Slip resistance | ASTM F 1677 - Dry/Wet: I.0/0.8 <br> DIN5II30: RII,VIO <br> DIN5 I 097: Classification C |
| Thermal | Designed to function at temperatures from $-9^{\circ} \mathrm{F}$ and up to $+140^{\circ} \mathrm{F}$. Slight size variation may occur at temperature extremes |
| UV light | Resistant to PVC degradation. The red colour isn't colourfast in direct sunlight. |
| Warranty | One year. Visit our policies page for more information about warranties. |

## Installation:

Floorline's one-piece construction means installation is simple:

- Comes in 33' rolls
- Easy to cut to fit on site
- No special tools or previous site visits needed
- Contours to uneven surfaces

## Cleaning:

Regular cleaning will maintain both the effectiveness and lifespan of Floorline.

The matting has both anti-bacterial and anti-fungal additives to protect against fungal and bacterial contamination, but regular cleaning is also recommended to remove light grease and oils, food fat, wax and acrylic polishes.

## PREPARATION

Check the matting is free from any loose items like litter and clothing fibres.

## HAND CLEANING

Regular hand cleaning should be done as required, using an alkaline cleaning fluid as per the manufacturer's instructions. The matting can be cleaned in position - simply apply the cleaning solution with a sprayer or mop and allow to penetrate any grease or dirt. You can then use a stiff deck brush to work the cleaning fluid into the surface dirt. Allow to soak before rinsing with clean water.

## MACHINE CLEANING

How frequently you machine clean will depend on how much traffic the area gets. Spray the surface with the alkaline solution and then, using a cylindrical brush machine, clean the top surface in the direction of the top ribs. If there's an etched pattern on the top ribs where dirt can easily collect, make additional cross passes to ensure a thorough clean.

If the underside of the matting also needs a clean, roll it up and then roll back out, leaving the underside facing upwards. Repeat the spray and above cleaning instructions.

## STEAM CLEANING

Any type of steam cleaner can be used. Good results have been obtained with nozzle pressure of approximately $6894.8 \mathrm{kN} / \mathrm{m}^{2}$ ( 1000 lbs p.s.i.) and water temperature of approximately $212^{\circ} \mathrm{F}$. Cleaning fluid should be diluted according to the manufacturer's recommendation.

Download our cleaning instructions for more information.
